

VIRTUAL SELLER

an online retailing solution: www.virtualseller.co.uk

Update Product Info

With the Virtual Seller solution you can

easily change product prices or other details. Product images can be uploaded at the click of a mouse.

Invoicing & VAT

The system will produce VAT invoices

for your customers and also email you copies if required. All the invoices are stored in the database and can be exported in Excel format.

Enquiry Handling

Enquiries can be taken online and are permanently stored in the database for analysis as well as being forwarded to an email address or addresses of your choice.

Delivery Charges

Delivery charges are often one of the more complicated issues to deal with when online retailing.

The Virtual Seller system is flexible enough to cope, allowing you to attach charge groups to individual products or groups of products and reduce charges, where appropriate, for high quantity purchases.

Email Promotions

Once your customers have purchased and their details have been stored you can email them with special promotions at the click of the mouse.

Special Offers & News

You may want to run a special promotion - sell off old stock or let your customers know other news about your business. On your website you will be able to highlight such information on your home page.

Update Your Own Pages

With our easy to use Content Management System you can change the text on your web pages and upload pictures with no technical expertise.

Simple changes such as spelling mistakes can be corrected in seconds without the need to wait for an IT professional to carry out the required changes for you.

Future Proofed

Our solution is future proofed, you get enhancements free of charge and you benefit from the ideas and initiatives our development team implement.

Payment Online

On your website you will be able to take payment online from major credit cards or PayPal. Depending on the route you choose there may be third party costs from your bank or payment service provider.

Project Management

We all know it's people rather than technology that really make things happen. Our project management expertise will ensure your project will run smoothly and timely.

Training

Whilst the system is simple to use, many find computers difficult, so to ensure you get the most out of Virtual Seller we provide training and a user manual.

Training is delivered at your premises by our qualified trainers.

Telephone Support

To provide you with reassurance expert telephone support is provided, 9.00 a.m. - 5.00 p.m., as part of our service agreement with you.
